DETAILED ACTION

Allowable Subject Matter

Claims 1-14 and 16-20 are allowed. The following is an examiner's statement of reasons for allowance:

The claimed invention is a system for molding a circuit package comprising:

- A first support plate;
- A second support plate proximately positioned with respect to first support plate;
- and
- A cavity plate positioned between the first support plate and the second support plate, the cavity plate having an aperture configured to accept only a protruding portion of the circuit package such that the protruding portion of the circuit package contacts the first support plate, and where the aperture is sized to create a peripheral void about only the protruding portion of the circuit package to permit a molding compound to be disposed thereabout.

Reference Neu (US 5,405,255) discloses an encapsulation molding apparatus for encapsulating the entire IC chip; therefore, the circuit package does not contact the first support plate.

Reference Chia et al. (US 6,081,997) disclose a packaging system for encapsulating the IC chip. However, Chia et al. do not disclose a cavity plate.

Therefore, the above references do not disclose the claimed invention of the present application and claims 1-14 and 16-20 are allowed.
